

This Business Analysis Practice course (formerly Business Analysis Essentials) provides delegates with the knowledge to become effective [business analysts](#). The course explores business analysis practice techniques including business activity modelling, stakeholder management, SWOT analysis, and gap analysis.

During the Business Analysis Practice training course, delegates will be encouraged to apply these techniques in the context of a business analysis assignment. The stages of this assignment involve the investigation of the business situation, analysis of key issues and their root causes, gap analysis to establish the business problems and the identification and evaluation of potential solutions.

Business Analysis Practice training is administered by trainers with significant experience of practical business analysis projects. The case study supporting the course is based on a genuine consultancy assignment. Delegates are supplied with a comprehensive manual, containing detailed information about business analysis techniques and providing references for further reading.

All course materials and exam fees are included in the price.

For a detailed overview of everything, you will cover on the course, download the [Foundation Certificate in Business Analysis Practice Syllabus](#).

## BCS Certification

This Business Analysis Practice course prepares participants for the one-hour, open book, examination leading to the Certificate in Business Analysis Practice offered by BCS, The Chartered Institute for IT. This certificate is a core module for the Business Analysis Diploma and is a specialist module in the Solution Development Diploma.

---
