What is the Windows Server Security Fundamentals (M40367) Course?

This three-day MTA Training course helps you prepare for Microsoft Technology Associate Exam 98-367, and build an understanding of these topics: Security Layers, Operating System Security, Network Security, Security Software. This training course leverages the same content as found in the Microsoft Official Academic Course (MOAC) for this exam.

What are the Windows Server Security Fundamentals (M40367) Course Objectives?

After completing this training course, students will be able to:

- Understand Security Layers
- Understand Operating System Security
- Understand Network Security
- Understand Security Software

Who is this Windows Server Security Fundamentals (M40367) Course for?

The Microsoft Technology Associate (MTA) is a new suite of Microsoft certification exams that validate fundamental knowledge needed to begin building a career using Microsoft technologies. This program provides an appropriate entry point to a future career in technology and assumes some hands-on experience or training but does not assume on-the-job experience.

Course Outline:

Module 1: Understanding Security Layers

Module 2: Authentication, Authorization, and Accounting.

Module 3: Understanding Security Policies

Module 4: Understanding Network Security

Module 5: Protecting the Server and Client
