Become part of the fastest growing industry in the world; we make it possible for non-developers to quickly and easily acquire the skills for Mobile Web Design.

What is Mobile Web Design Training?

After our 1-day mobile web design training course you'll leave us ready and eager to begin building your mobile websites right away! You can download our free Mobile Development eBook to get you started.

You'll be taught how to build mobile websites using Dreamweaver and the simple jQuery mobile framework - you don't need existing knowledge of jQuery to come on this course, and you don't need to know HTML or CSS.

Your trainer will be an experienced mobile web developer with extensive industry knowledge - they will deliver a hands-on course that really gets results.

Our public mobile web design course is held at our dedicated training centre in **Brighton**. If you'd prefer us to come to you, or if you'd like a private training session here, just give us a call - we'd be happy to accommodate. Our number is +44 (0)1273 622272.

If you'd like to learn more about creating mobile websites from scratch, we also offer in-depth training with our 1-day Responsive Web Design overview and courses in the HTML5 & CSS3 and JavaScript you need to build the sites.

Course Objectives

After attending our Mobile Web Design training course, you will have gained:

- An overview of mobile websites, including mobile websites vs. apps
- Practical knowledge in creating pages and adding content
- The ability to do simple styling of the pages using themes
- Knowledge of adding content transitions

Introduction

- What is Mobile Web Design?
- Mobile web vs mobile Apps
- What is jQuery?

Tel +44 20 4571 2395
info@siliconbeachtraining.co.uk
