What is MSP® Advanced Practitioner training?

Building upon acquired knowledge from the MSP® Foundation and Practitioner course, this MSP® Advanced Practitioner course encourages a greater understanding of the multifaceted constituents and processes involved in managing successful programmes (MSP), whilst confirming that delegates have the skills to lead a programme of transformational change. Upon completion and certification of this internationally accredited MSP® Advanced Practitioner Training Course, candidates will have the skill-set and knowledge of how to productively lead a programme of organisational change, regardless of the size of alteration or programme.

As the highest qualification available for the Managing Successful Programme methodology, this Advanced Practitioner Training Course will educate you on the application of MSP® and Transformational Flow principles, whilst encouraging the importance of pragmatic and astute programme management. This certified 2-day MSP® Advanced Practitioner Training Course is led by accredited individuals to ensure that you have the best opportunity and assistance to pass the MSP® Advanced Practitioner exam. In addition to being an accolade of your superior Programme Management abilities, completion of this MSP® Advanced Practitioner course can significantly elevate your earning potential to between £40-85k.

This MSP® Advanced Practitioner Training Course would be beneficial for programme managers, stakeholders, business change managers, and project managers that have a desire to expand upon their knowledge of how to implement the best-practice framework of MSP®, into their own programmes.

Benefits for Individuals:

Individuals undertaking this training course can benefit from having an accredited qualification that alludes to and proves their project/programme management competencies, judgement, stakeholder and team management, critical decision-making skills, and problem-solving perspective

Benefits for Businesses:

This MSP® Advanced Practitioner training course is beneficial for businesses due to optimising people power, financial resources, and elevating the probability of project success - all of which can be influenced by astute, considerate, knowledgeable, and organised project management

How is the MSP® Advanced Practitioner exam structured?

Towards the conclusion of the 2-day Advanced Practitioner training course, a mock exam with exam sample questions will be conducted where your answers are briefly discussed with the experienced instructor - giving you the best possible preparation prior to sitting the exam. The MSP® Advanced Practitioner exam consists of:

- A 3-hour essay-style assessment
- Two questions per paper
- 75 marks available, with a 50% pass mark required for certification
- Open Book examination - candidates are allowed to utilise the MSP Guide and Course Notes

Pre-Course Reading and Supplied Materials

- MSP® Manual with a Case Study to read prior to the course starting (8 hours of content)
- Coursework Book
- Examination
- Certificate
- Tuition from a highly experienced and accredited instructor

Refreshments
