If you already know the Photoshop basics, our **Photoshop Masterclass training course** will blow your mind and take you to the next level!

You'll come away from this intensive, hands-on photoshop training course with the ability to make advanced selections, use composite layers in ways you never thought possible, and be able to retouch photographs like a pro.

Learn the techniques necessary to create, manipulate and edit professional quality images with skill and precision from our expert trainers who all have extensive industry experience as designers and photographers.

If you are involved in creating content for the web as a blogger or web designer, you may be interested in our Photoshop Training for Web Graphics course which focuses on creating and optimising graphics for web sites. Photoshop is ideal for this; something we explain in our free Photoshop for the Web eBook.

Our Photoshop Masterclass courses take place in the digital hub of Brighton, but we also provide in-company training at the location of your choice and tailored private courses at our premises. Call us +44 (0)1273 6222722 to discuss your requirements.

Prerequisites

Our Photoshop Masterclass course is suitable for designers and photographers who already have working experience of Photoshop.

Course Objectives

After 1 day of Photoshop Masterclass training, you will be able to:

- Use masks and layers to an advanced standard
- Understand a variety of ways to make advanced selections and apply the most appropriate for each purpose
- Use the Camera Raw plugin to its full extent
- Use retouching features to make pictures perfect
- Use Adobe Bridge to organise, proof and process images in batches
