BCS Intermediate Software Testing Course Format

This BCS Intermediate Software Testing course is a three-day tutor led course using a mixture of slide presentation, lecture and practical exercises using scenario-based multiple choice questions. A revision session using scenario-based multiple choice questions and mock exam take place on the morning of day four. The exam is sat on the afternoon of day four.

Prerequisites

To attend this course you must hold a valid BCS/ ISTQB Foundation in Software Testing Certificate.

Course Objectives

The objectives of this course are:

- To prepare candidates for the examination for the BCS Intermediate Certificate in Software Testing based on the BCS syllabus
- To extend understanding of software testing – its application and management – its key disciplines – and to enhance awareness of issues and constraints around testing

The objectives of the BCS Intermediate certificate are:

- To provide a sound basis for candidates intending to register for either the Practitioner in Test Management Examination or the Practitioner in Test Analysis Examination. The Intermediate Certificate is a pre-requisite for entry to either of these examinations
- To ensure that candidates for either of the Practitioner Certificate examinations have a broad understanding of the other specialist area
- To cover specific topic areas that both specialisations should understand

Testing Fundamentals:

- Review of the Foundation Certificate syllabus; application domains; testing in the lifecycle; the fundamental test process.

Reviews:

- The principles of reviews; types of review; using different review types; performing a formal review.

Testing and Risk:

- Introduction to risk and risk-based testing; risk management; product risk identification and analysis.

Test Management:

- Test policy, test strategy, test plans; entry and exit criteria; estimating techniques; test monitoring; incident management process.

Test Analysis:

- Fundamentals of test analysis; test environment requirements; selection of techniques; coverage measures.
